

RiverStreet Networks

Network TRANSPARENCY Statement

RiverStreet Networks (“RiverStreet” or “Company”) provides this Network Transparency Statement in accordance with the FCC’s Restore Internet Freedom Rules to ensure you have sufficient information to make informed choices about the purchase of broadband services. Information about RiverStreet’ other policies and practices concerning broadband are available at www.myriverstreet.net (“RiverStreet Website”).

RiverStreet engages in network management practices, which are tailored and appropriate for achieving optimization on the network considering the particular network architecture and technology of its broadband Internet access service. RiverStreet’s goal is to ensure all of its customers experience a safe and secure broadband Internet environment that is fast, reliable, and affordable. RiverStreet wants its customers to indulge in all the Internet has to offer, whether it is social networking, streaming videos and music, to communicating through email and videoconferencing.

RiverStreet’s network management includes congestion and security-protocol-management and customers generally will not be impacted by the protocols and practices that RiverStreet uses to manage its network.

A. RiverStreet's Network Transparency Disclosures

RiverStreet uses various tools and industry standard techniques to manage its network and deliver fast, secure, and reliable Internet service. RiverStreet believes in full transparency and provides the following disclosures about its network management practices:

1. **Blocking:** RiverStreet does not block or discriminate against lawful content.
2. **Throttling:** RiverStreet does not throttle, impair, or degrade lawful Internet traffic.
3. **Affiliated Prioritization:** RiverStreet does not prioritize Internet traffic and has no plans to do so.
4. **Paid Prioritization:** RiverStreet has never engaged in paid prioritization. We don’t prioritize Internet for consideration to benefit particular content, applications, services, or devices. RiverStreet does not have plans to enter into paid prioritization deals to create fast lanes.
5. **Congestion Management:** RiverStreet monitors the connections on its network in the aggregate on a daily basis to determine the rate of utilization. If congestion emerges on the network, RiverStreet will take the appropriate measures to relieve congestion.

On RiverStreet's network, all customers have access to all legal services, applications, and content online and, in the event of congestion, most Internet activities will be unaffected. Some customers, however, may experience longer download or upload times, or slower surf speeds on the web if instances of congestion do occur on RiverStreet's network.

Customers using conduct that abuses or threatens the RiverStreet network or which violates the company's Acceptable Use Policy, Internet service Terms and Conditions, or the Internet Service Agreement will be asked to stop any such use immediately. A failure to respond or to cease any such conduct could result in service suspension or termination.

RiverStreet's network and congestion management practices are 'application-agnostic', based on current network conditions, and are not implemented on the basis of customers' online activities, protocols or applications. RiverStreet's network management practices do not relate to any particular customer's aggregate monthly data usage.

RiverStreet monitors its network on a regular basis to determine utilization on its network. RiverStreet also checks for abnormal traffic flows, network security breaches, malware, loss, and damage to the network. If a breach is detected or high volume users are brought to light by complaint, RiverStreet provides notification to the customer via email or phone. If a violation of RiverStreet's policies has occurred and such violation is not remedied, RiverStreet will seek to suspend or terminate that customer's service.

6. **Application-Specific Behavior:** Except as may be provided elsewhere herein, RiverStreet does not currently engage in any application-specific behaviors on its network. Customers may use any lawful applications with RiverStreet.
7. **Device Attachment Rules:** Customers may be required to use PPPoE for authentication of point to point connections between devices on the network. There is a limit of one (1) PPPoE session per account. For best results, DSL modems, wireless modems, or other proprietary network gateways used on the RiverStreet broadband network should be provided by RiverStreet. Customers may attach devices of their choosing to their modems, including wired or wireless routers, laptops, desktop computers, video game systems, televisions, or other network-enabled electronics equipment. However, **customers** are responsible for ensuring that their equipment does not harm RiverStreet's network or impair the service of other customers. RiverStreet is not responsible for the functionality or compatibility of any equipment provided by its customers. Customers are responsible for securing their own equipment to prevent unauthorized access to RiverStreet's broadband network by third parties and will be held responsible for the actions of such third parties who gain unauthorized access through unsecured customer equipment.

8. Network Security: RiverStreet knows the importance of securing its network and customers from network threats and annoyances. The company promotes the security of its network and patrons by protections from such threats as spam, viruses, firewall issues, and phishing schemes. RiverStreet also deploys spam filters in order to divert spam from an online customer's email inbox into a quarantine file while allowing the customer to control which emails are identified as spam. Customers may access the spam files through the email. Spam files are automatically deleted if not accessed within 30 days.

As its normal practice, RiverStreet does not block any protocols, content, or traffic for purposes of network management, but RiverStreet may block or limit such traffic as spam, viruses, malware, or denial of service attacks to protect network integrity and the security of our customers.

B. Network Performance

1. Service Descriptions

RiverStreet deploys Internet access to its subscribers through fiber optic, DSL, cable/coax, and fixed wireless.

2. Network Performance

RiverStreet makes every effort to support advertised speeds and will offer technical assistance in ensuring service delivery. If a customer is unable to resolve their speed issue, RiverStreet may dispatch repair technicians to customer sites to perform speed tests as needed to troubleshoot and resolve speed and application performance caused by RiverStreet's network. RiverStreet measures availability, latency, and aggregate utilization on the network and strives to meet internal service level targets.

However, the bandwidth speed at which a particular distant website or other Internet resources may be downloaded, or the speed at which your customer information may be uploaded to a distant website or Internet location is affected by factors beyond RiverStreet's control, including the speed of the connection from a distant web server to the Internet, congestion on intermediate networks, and/or limitations on your own computer equipment, including a wireless router. In addition, your service performance may be affected by the inside wiring at your premise. Accordingly, you, the customer, must consider the capabilities of your own equipment when choosing a RiverStreet broadband service. Your computers and/or wireless or other networks in your homes or offices may need an upgrade in order to take full advantage of the chosen RiverStreet broadband plan.

For the wireless service, RiverStreet measures Bit Error Rate (BER) and the Received Signal Strength Indicator (RSSI) parameters for transmission rates, latency, and traffic every 15 min.

For DSL, Fiber and T1 service, RiverStreet measures traffic every 5 min. All services are best effort.

RiverStreet tests each service for actual and expected access speeds at the time of network installation to demonstrate that the service is capable of supporting the advertised speed. Customers may also test their actual speeds using the speed test located at <http://speedtest.wilkes.net> on RiverStreet's website and may request assistance by calling our business office at 336-973-3103 or by email at rsinfo@myriverstreet.net.

Based on the network information RiverStreet receives from its monitoring efforts, RiverStreet's network is delivering data transmission rates advertised for the different high-speed Internet services. To be sure, RiverStreet has implemented a program of testing the performance of its network by using a test protocol similar to the one sanctioned by the FCC. We installed specific network performance monitoring equipment at aggregation points across our network and conducted a series of tests using this equipment. RiverStreet reports the results of this testing below. This result applies to both upload and download data rates, and applies for measurements made both at peak times and over a 24-hour period:

Fiber-to-the-Home Service

Download Speeds

ADVERTISED	ACTUAL SUSTAINED	PERCENTAGE DIFFERENTIAL
3 Mbps	3 Mbps	0%
10 Mbps	10 Mbps	0%
25 Mbps	25 Mbps	0%

Upload Speeds

ADVERTISED	ACTUAL SUSTAINED	PERCENTAGE DIFFERENTIAL
25 Mbps	25 Mbps	0%
50 Mbps	50 Mbps	0%
100 Mbps	100 Mbps	0%
250 Mbps	250 Mbps	0%
1 Gig	1 Gig	

DSL Service

Download Speeds

ADVERTISED	ACTUAL SUSTAINED	PERCENTAGE DIFFERENTIAL
6 Mbps	6 Mbps	0%
12 Mbps	12 Mbps	0%
20 Mbps	20 Mbps	0%
50 Mbps	50 Mbps	0%

Upload Speeds

ADVERTISED	ACTUAL SUSTAINED	PERCENTAGE DIFFERENTIAL
6 Mbps	6 Mbps	0%
12 Mbps	12 Mbps	0%
20 Mbps	20 Mbps	0%
50 Mbps	50 Mbps	0%

Download Speeds

ADVERTISED	ACTUAL SUSTAINED	PERCENTAGE DIFFERENTIAL
256 k	256 k	0%
512 k	512 k	0%
768 k	768 k	0%

Upload Speeds

ADVERTISED	ACTUAL SUSTAINED	PERCENTAGE DIFFERENTIAL
512 k	512 k	0%
1.5 Mbps	1.5 Mbps	0%
3.5 Mbps	3.5 Mbps	0%
6 Mbps	6 Mbps	0%
12 Mbps	12 Mbps	0%

3. Impact of Non-BIAS Data Services

The FCC has defined Non-Broadband Internet Access Services (Non-BIAS) to include services offered by broadband providers that share capacity with Broadband Internet Access Services (BIAS) (previously known as “Specialized Services”) also offered by the provider over the last-mile facilities. At this time, RiverStreet is not offering any non-BIAS data services.

Alternative Language if Company is offering Non-BIAS services:

Real time services, such as Non-BIAS services, include Voice over Internet Protocol (VoIP) and Internet Protocol (IP) video services, command optimal bandwidth. As Non-BIAS traffic is combined with general Internet traffic on RiverStreet's network, broadband customers could experience service delays, although very unlikely, if there is an occurrence of congestion on RiverStreet's network. In any such event, the Non-BIAS traffic is given priority over general Internet traffic.

Example VoIP Non-BIAS data service Language:

RiverStreet provides Voice-over-the-Internet-Protocol (VoIP) to its fixed wireless customers. The VoIP traffic uses private RFC 1918 addresses, dedicated paths for VoIP and QoS on the routers/switches it touches. The QoS priority is based on the source and destination IP. Where VoIP traffic is combined with best effort Internet traffic and QoS priority is employed, the network could endure marginal delays if there are instances of bandwidth contention, although very unlikely.

Example IP Video Non-BIAS data services Language:

The Company offers IP video service to end-users. This non-BIAS data service does not adversely affect the last-mile capacity available for the Company’s broadband Internet access services, or the performance of such services. Customer should note that significantly heavier use of non-BIAS services (particularly IP video services) may impact the available capacity for and/or the performance of its broadband Internet access services. The Company will monitor this situation, and appreciates feedback from its customers.
